Agroforestry and the Green Architecture of the New CAP

Pre-event towards
The 5th European Agroforestry Conference
Nuoro, 17th-19th May 2021

Purpose: *The new CAP is entering triologue discussions between the Commission, European Parliament and the Council of Agricultural Ministers.*

Agroforestry is mentioned in several places in the draft Strategic Plan Regulation, and in the Farm to Fork Strategy and Biodiversity Strategies, which are all part of the European Green deal.

Its considerable potential is stressed, but so too are the administrative and knowledge barriers. This workshop focuses on overcoming these barriers.

What lessons can be learnt from previous agroforestry policies? What policy instruments should be proposed in the new CAP? What is the role of research and extension?

How can Member States use the new policies to encourage agroforestry in ways specific to their needs? Are there opportunities for carbon farming funds outside the CAP?
